OBVIOUS WORKS

Your Partner for
AI, Agility & Requirements

CERTIFICATE

OF
COMPLETION

Aleksandar Avramov

has successfully completed our programme:

AI DEVELOPER BOOTCAMP

- LLMs, prompting, context limits, and where AI pays off in development
- AI IDEs, coding assistants and local models in daily development work
- Rules & Custom Instructions: keeping the agent inside a defined frame
- Context (as a scarce resource) Engineering: compression, progressive disclosure
- Tools & Model Context Protocol (MCP): connecting agents to real systems
- Skills: teaching the agent how the team works
- Spec-Driven Development: from idea to a merged pull request
- Memory: durable artefacts and a long-term brain for the agent
- Hooks & Security: determinism instead of trust
- AI-assisted documentation, code review and agentic workflows outside the IDE
